-----  
What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

What is a telecommunications enclosure?

Telecommunications enclosures are used in protecting electrical equipment in charge of transporting voice, video and other data for a number of industries. Telecommunications companies rely on custom and standard NEMA-rated electrical boxes to protect their sensitive equipment.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.
