Suny Group's solar panel sorting and recycling production line is a highly efficient and automated waste photovoltaic module recycling system. It primarily uses physical methods to dismantle, crush, grind, ...

Featuring a 6-axis robot and up to six pallets for detailed sorting based on module power class, this system efficiently manages the placement of solar modules into designated pallets after testing.

A Solar Panel Grading Machine is an automated industrial system designed to evaluate, categorize, and sort photovoltaic (PV) modules based on their electrical performance, primarily output power.

It consists of a six-axis robot and four pallet sorting machines up to six are ...

Optimize your production line with our advanced solar panel sorting machine featuring an automatic solar cell IV tester. Designed for precision, this solar panel tester and testing machine ensures ...

Clients in the solar manufacturing sector prioritize quality and precision in their production processes. The Auto Solar Panel Sorting Machine is engineered to ensure accurate sorting of solar panels ...

Our portfolio includes not only automatic solar panel production lines, but also individual equipment for PV modules production, from glass loading equipment at the beginning to solar panel assembly and ...

Explore the final steps of solar panel production. Learn how framing, sorting, and packing machines work and see the differences between manual and automated systems.

Revolutionize your solar cell production with our next generation automated inspection and sort system. This loader/unloader with inspection is the cornerstone of efficient BSG process. It delivers precise ...

It consists of a six-axis robot and four pallet sorting machines up to six are optional). The robotic arm uses a special vacuum system to remove modules from the test area and store them in four or more ...

Solar Photovoltaic Panel Sorting Machine

Argus has always remained in close contact with the production process and this makes it possible to analyze and develop new configurations of photovoltaic panels with new raw materials and to ...
