What is solar power tape?

This advanced solar power tape is used for positioning and securing solar module cells, ensuring optimal performance and longevity in demanding photovoltaic applications. Crafted with a durable PET backing and coated with high-performance silicone rubber adhesive, our Solar Power Tape offers exceptional adhesion strength to photovoltaic glass.

What are photovoltaic tapes used for?

Photovoltaic tapes for the renewable energy market for bonding, venting, insulation, protection & masking. Custom rolls & die-cut shapes available.

Which solar panel adhesive tape is best?

Our high-quality solar panel adhesive tapes, tesa #174; 62510 double coated PE foam tapes, are favored by manufacturers for simplifying solar module assembly thanks to their high ultimate adhesion levels and inner strength. And of course, both tapes are engineered for outdoor use thanks to their UV, water, and age resistance.

How long does solar tape last?

PROTEK(TM) film solar tape also resists UV and outdoor aging up to 6 months. High bond tapes and custom pre-cut forms stick permanently to attach junction boxes to solar modules. Convenient peel and stick tape bonds quickly while high strength adhesive continues to get stronger over time for a lifelong, UV resistant hold.

At Saint-Gobain, our expert Photovoltaic Tape and Solar Cell Tape solutions can solve the most demanding applications and challenges in your Energy Market.

Get custom cut tapes from LAMATEK(TM) for solar panel frame bonding, junction boxes, and edge protection. Separator pads and surface protection films available.

The Tape Solution(TM) (TTS) is an innovative, technology flexible for all cell interconnection and string production technology that avoids lead, decreases silver consumption, lowers cost, increases ...

Solar Photovoltaic Power Generation Tape

Our precision-coated, structured 3M Solar Films help increase module power, provide moisture protection, and improve the aesthetic of the module. Help speed up assemblies, and improve the ...

3M(TM) Solar Edge Tape 1060 is specifically designed for solar module sealing and protection. It consists of high-quality acrylic foam adhesive with superior weathering black backing film.

This advanced solar power tape is used for positioning and securing solar module cells, ensuring optimal performance and longevity in demanding photovoltaic applications.

Solar tape is used in the production process of photovoltaic modules and maintenance, including solar cell fixing tape, solar edge tape solar repair tape, etc. The color is transparent color or black. The ...

Avery Dennison offers pressure-sensitive adhesive tape solutions for a variety of solar panel bonding applications. These durable, UV-resistant solutions are easy to use and automate, and can facilitate ...

To meet the growing demand for electricity while reducing carbon emissions, the world is turning more towards eco-friendly power generation such as solar. Here at tesa, we have developed proven, ...

Photovoltaic tapes for the renewable energy market for bonding, venting, insulation, protection & masking. Custom rolls & die-cut shapes available.
