Plug-in solar has remained in the shadows because of a lack of safety standards and often costly requirements imposed by utilities, but that's changing.

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

Lawrence Berkeley National Laboratory compiled and synthesized empirical data on the U.S. utility-scale solar sector.

Although interest-rate spikes and policy uncertainty around tax credits create near-term headwinds, the fundamental economics of residential self-generation remain favorable, underpinning ...

When it comes to installing solar, our resources can help you determine the best options.

The global residential solar PV market was valued at USD 94.2 billion in 2024 and is estimated to reach the value of USD 198.9 billion by 2034, growing at a CAGR of 7.9% from 2025 to 2034.

Texas installed the most solar capacity in the first half of 2025 (3.8 GW dc), followed by California, Indiana, and Arizona. In Q2 2025, the residential segment installed 1,064 MW dc of solar ...

The latest government data discusses U.S. solar energy capacity, efficiency, and available homeowner tax credits as well as renewable energy trends.

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

The U.S. residential solar PV market size was estimated at USD 7.45 billion in 2023 and is expected to grow

Solar power generation household market capacity

at a CAGR of 14.4% from 2024 to 2030

Uses local climate data, your roof measurements, current local electric rates and current solar system cost to generate an accurate solar cost and savings estimate, customized for your home.

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on Earth is ...
