Congress is currently debating the fate of costly renewable subsidies within the Inflation Reduction Act, which would increase wind and solar power, causing utility rates to increase, and ...

Not only does solar power receive tax subsidies, but it has also garnered sizable federal loans, particularly during the Obama-Biden administration. Solar plants are touted to operate for ...

Under the Trump administration energy policy, as federal subsidies cease to buttress investor confidence and prop project viability, solar industry must shine on its own merits.

The Trump administration has defended its moves to end support for clean energy by arguing the rapid adoption of solar and wind power has created instability in the grid and raised ...

The recent shift in federal energy policy marked by the passage of the One Big Beautiful Bill Act has sparked a significant debate regarding the future of wind and solar energy subsidies.

Several federal clean energy incentives are set to expire or change by the end of 2025 or mid-2026, affecting solar projects and more. Here is a quick overview of the key deadlines and what ...

Last month, Rep. Fedorchak introduced the Ending Intermittent Energy Subsidies Act, legislation to responsibly phase out production and investment tax credits for wind and solar energy ...

On September 24, 2025, the U.S. Department of Energy announced the cancellation of nearly \$13 billion in clean energy subsidies. This decision, aimed at reducing taxpayer burdens, raises questions about ...

Wind and solar projects must be under construction by July to be eligible for federal tax credits that Congress voted this summer to eliminate, years earlier than previously required.

Solar power generation subsidies will be exhausted in a few years

The passage of the " One Big Beautiful Bill Act " means that subsidies for wind and solar power are slated for repeal after 2027. Unsurprisingly, this has sparked a litany of analyses ...
