The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

The combined capacity at pre-construction and announced stages for utility-scale solar power reaches 387 GW and 336 GW for wind. This includes the second and third waves of "mega ...

In 2025, the U.S. will add a record 63 gigawatts of new power capacity, with 93% coming from carbon-free sources. Solar and batteries will dominate the market, while natural gas faces a ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

On this page, you can explore our database of planned solar projects in the US. Each month, we track projects in development and update our list of the largest planned solar projects expected to come ...

As we delve into the details of this energy landscape, we'll explore how solar and battery technologies are reshaping the U.S. power grid and contributing to a more sustainable future.

Almost three-quarters of all solar and wind power projects being built globally are in China, says a new report that highlights the country's rapid expansion of renewable energy sources.

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

FirmoGraphs is tracking more than 100 very large solar projects starting construction in 2023 with a total estimated value of nearly \$40 billion.

Solar power generation under construction

From California to New England, construction of solar energy is picking up speed, showing promise for hitting sustainability goals. In this article, we cover the largest solar energy ...
