Geda Solarlifts - Different Modalities For Your Application Area
Unique Concept: The Solar Platform
Geda Solarlift - One Device, Several Advantages
The GEDA Solarlift has particularly been designed for working with sensitive materials and offers a specific solar platform for a safe transport of expensive solar panels. The platform provides a specially developed plastic surface and an extra fixation possibility which can be adjusted as desired. The second transport variation is the collector pl...

SOLAR SOLUTIONS - RGC Hoisting
Capable of lifting heavier solar equipment and materials--up to a ton in weight--and reaching heights of up to 700 feet, this hoist is engineered to handle the demands of larger-scale solar installations.

The GEDA Solarlift has particularly been designed for working with sensitive materials and offers a specific solar platform for a safe transport of expensive solar panels.

This innovative tool enables you to lift solar modules to the roof with ease and precision, making installation faster, safer, and more efficient. With its compact design and simple operation, Module ...

The Fluke Module Lift(TM) is designed to safely and quickly transport a PV module to a roof, streamlining the installation process of solar panels. This innovative tool enables you to lift solar modules to the ...

It takes less than 30 seconds to safely and easily lift solar panels and equipment to a two-story roof. At the end of the day simply tuck your lift into a regular work van, or even a car, where it is ready to set ...

Specially designed with a custom carrier that functions as a cargo receptacle, GEDA's solar panel lift is a space-saving way to reach inaccessible loading areas.

Capable of lifting heavier solar equipment and materials--up to a ton in weight--and reaching heights of up to 700 feet, this hoist is engineered to handle the demands of larger-scale solar installations.

The TranzVolt is a battery powered, solar panel hoist, which allows for the vertical lift of modules to the

Solar support installation lift

rooftop. This is an excellent option for projects located in remote, off grid, or new construction areas ...

The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder.

No tools are required for installation. The main part of the lift is as simple as connecting the sections of the rail ladder using ring nuts and bolts, and can be completed in 20 minutes by two installers (for a ...

When mounting solar panels, a stable ladder setup is essential for safety and efficiency. This guide highlights top ladder-related products that help installers reach rooftops, stabilize ladders, and secure ...
