Driven by intense load-shedding, South Africa tripled its solar panel imports in 2023, reaching a record-breaking R17.5 billion.

South Africa's new 10% import duty on panels aims to protect local producers, but industry players warn it could push up costs and delay projects during a critical phase of the transition.

South Africa imported 3.8 GW of solar panels in 2024; this is following "a record-breaking 2023 when 4.3 GW were imported as consumers turned to the technology amid rising blackouts".

South Africa has announced its contribution to renewable energy with an impressive R17.5 billion commitment in solar panel imports since 2023, representing an upward trend and over ...

South Africa remained the top importer, ahead of Nigeria and Algeria, but other markets are growing faster. Imports outside South Africa almost tripled over two years, rising from 3,7 GW to ...

Twenty countries set records for solar panel imports in the 12-month period, while 25 countries imported at least 100 MW. South Africa remained the biggest importer. Nigeria overtook ...

Solar imports into Africa increased by 60% between July 2024 to June 2025, setting a new record and showing the strongest sign yet of a continent wide shift to renewable energy. The ...

Last year, South Africa imported Chinese solar panels that could power 3.8 million homes, establishing itself as a leader in the renewable energy sector on the continent.

CAPE TOWN, South Africa -- Solar panel imports into Africa reached 15 gigawatts by mid-2025, a 60% year-on-year increase signaling rapid clean energy adoption across the continent, ...

South Africa imports solar power generation system

South Africa continued to be the largest solar importer in the 12 months to June 2025. Nigeria has become the second-largest importer of solar panels, with 1,721MW brought in over the ...
