The residential battery market is driven by the growing demand for renewable energy solutions, such as solar power, which encourages homeowners to seek efficient energy storage options. For instance, ...

February 3 - Demand for battery storage is rising on the back of massive investment in solar and wind power, wider electrification efforts and a need to strengthen grid reliability.

Customers expect to be fully covered for the cost to charge the battery from the grid after each event (even if they have solar). They have no expectation of enrollment bonus. Emphasize how, when and ...

The target customers of home energy storage are a diverse bunch, ranging from eco-warriors to pragmatists who just hate surprise power bills. In this guide, we'll explore who's jumping ...

Utilities are turning to storage to replace retiring coal units and to support solar and wind additions, and commercial customers view batteries as insurance against outages and peak charges.

The rising frequency of power outages caused by grid instability, combined with the swift increase in energy demand, is poised to drive investments in the implementation of advanced and ...
