---

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the ...

One promising option is the Vanadium Redox Flow Battery (VRFB), which has already been deployed and offers unique advantages for long-duration energy storage. With a long lifespan, ...

The Company develops solar and Battery Energy Storage System (BESS) projects that sell electricity to utilities, commercial, industrial, municipal and residential off-takers.

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) developed the first ...

When using a resource like vanadium, supply chains become increasingly critical, and cost can quickly rise. Storion, with access to Largo's vanadium mine in Brazil, is uniquely positioned ...

It is the first utility-scale battery energy storage project in the state and the Power Authority's first utility-scale battery project. The storage plant consists of five 53-foot walk-in ...

The development of grid-scale battery energy storage in New York is entering a critical phase. More than 19 GW of battery energy storage projects are advancing through NYISO's reformed ...

Vanadis Energy delivers advanced vanadium solid-state batteries offering superior safety, long life, and scalable performance for next-generation energy storage.

About the New York Battery and Energy Storage Technology Consortium (NY-BEST) y (NYSERDA) to position New York State as a global leader in energy storage technology. An industry-led consortium ...
