What is an uninterruptible power supply?

An Uninterruptible Power Supply is a backup UPS system which provides a continuous, stable and clean power supply to your electrical equipment and computer systems. In the event of a power failure the UPS system, which contains its own batteries, will continue to power your electrical equipment or systems for a set period.

What is uninterrupted power supply (UPS)?

In today's world where continuous power supply is vital for the successful functioning of any organization, MMR's Uninterruptible Power Supply (UPS) helps your enterprise enjoy uninterrupted power supply in instances of power cuts, a complete outage or mains failure.

What is an APC uninterruptible power supply?

An APC uninterruptible power supply (APC UPS) is a backup power source used during power failures. It delivers power to computers, peripherals, networks, servers, or data centers, allowing you to shut down the equipment properly.
