How do you take a solar project from conception to commission? As a full-service law firm, we have the expertise and experience to navigate all aspects of utility-scale solar projects.

From powering homes with small-scale residential systems to delivering large-scale solar farms, the Trilect Wellington solar team brings proven expertise and innovation to projects of all sizes.

To size the right solar system, you need to understand how much electricity you use and when you use it. You can also start with a smaller system and scale up over time.

Our mission is to accelerate the uptake of renewable energy in New Zealand by creating utility-scale solar assets across the country. We currently have consents to construct five solar farm sites with six ...

The 200 MW solar farm, near Wellington, New South Wales, is the largest single plant to be financed by the U.K. solar developer to date and one of the biggest projects in Australia to use ...

Low-cost, utility-scale solar and wind projects can be developed and brought online quickly--delivering a proven, scalable solution to meet near-term power needs.

Delivering sustainable, cost-efficient, utility-scale solar in Aotearoa requires a holistic view. Delivery needs to accommodate a uniquely local blend of sustainability, environmental, visibly unobtrusive, ...

With less than 0.5% of our energy currently from solar power, there is an opportunity to develop and grow this potential, especially through utility-scale solar.

We offer the following types of DG connection to the WEL network: Single Phase 10kW or less & Three Phase 30kW or less - usually these connection types apply to residential properties, small ...

Harnessing the sun's energy to power New Zealand's zero carbon future. Our first five solar farms will

Utility-scale solar wellington

generate enough energy to power 50,000 homes, or a city the size of Hamilton. And we're not ...
