The Solar-Hydro system will be incorporated with G8's marine engineered mooring and flotation technology to cater to different depth variations of the dam throughout the year, according to ...

The 5 MW floating solar farm, now officially the largest in West Africa, is a marvel of innovation. Installed on the surface of the Black Volta River, the project demonstrates how renewable ...

The Solar-Hydro system will be incorporated with G8's marine engineered mooring and flotation technology to cater to different depth variations of the dam throughout the year.

There is "huge" potential for floating solar PV systems in calm tropical maritime regions, specifically off the coasts of West Africa and south-east Asia, capable of generating about one million terawatt ...

Ghana is now home to the largest floating solar PV system in West Africa. It's part of a hybrid plant that utilizes both solar and hydro resources to generate and supply power to the...

Ghana has launched West Africa's largest floating solar project, marking a significant step towards increasing its renewable energy capacity. The country aims to raise its share of renewable energy ...

Ghana has launched West Africa's largest floating solar PV system to reduce its dependence on fossil fuels.

The GPM-65 Solar-Hydro System will occupy approximately 350,000m² of water space close to the Hydro dam vicinity. The Solar-Hydro system will be incorporated with G8 s marine engineered ...

Ghana has taken a significant step towards sustainable energy by launching West Africa's largest floating solar PV system. This innovative project aims to utilize solar and hydro ...

We specialise in mooring floating energy infrastructure in some of the world's most challenging
