Our product range includes Solar Panels, Solar Containers, Mounting Brackets, Complete Power Systems, Outdoor Lighting, and innovative Solar Fan Hats - all designed for demanding global ...

It sucks up the sun's rays to refill your device batteries. But perhaps the best part is you don't have to cram it into your already overstuffed pack. Instead, you wear it... on your head.

Hats with a built-in solar panel require exposure to direct sunlight and work until you stay in the sun. The high-quality fabric makes this hat durable and a perfect fit for people with sensitive skin. It is perfect ...

It's a solar-powered personal fan system built into a hat. The hotter it gets, the harder it works. Mini Fan Cools Your Face & Forehead: No batteries. No cords. Just breeze. Sun's out. Sweat's dripping. ...

What makes our solar fan hat stand out isn't just the cooling power--it's the combination of functionality and rugged outdoor performance: Battery-supported solar fan hat are more versatile. Whether you're ...

Electricity is produced by a protected motor mount on the hat crown along with a ...

The Solar Fan Hat isn't just a personal cooling accessory -- it's a commitment to green living. Studies show that one solar powered fan hat can reduce up to 50 USB recharges per year, saving ...

Let's be real: most "wearable tech" is just tech you wear. But this Solar Fan Hat is different. It's not about notifications, fitness data, or music. It's about keeping you cool when the sun is trying to ...

Putting it another way, the solar hat works better when not used as a hat. So the hat isn't that practical when it comes to powering devices but how is it as a hat? It is big enough to provide ...

Electricity is produced by a protected motor mount on the hat crown along with a lightweight PVC air guided fan that begins to spin when the motor is energized by sunlight. The fan then fills the hat with ...

What is a solar hat stand
