With the rise of competing renewable energy sources, solar photovoltaics have experienced a loss of market share. Finally, tightening environmental regulations have created ...

The cost of photovoltaic (PV) solar panels fell by nearly 80%, driven largely by massive manufacturing capacity in China.

This article delves into the evolution of Ivanpah, examining both its achievements and shortcomings as it confronts an uncertain future in a landscape dominated by more efficient ...

Federal tax credits for rooftop solar, heat pumps and other energy-efficient technologies are going away at the end of the year. Here's what consumers should know.

However, 2024 has brought immense challenges, with higher interest rates, tighter financing, and adverse policy shifts in key states contributing to over 100 solar bankruptcies based ...

Angry customers aren't the only reason the solar industry is in trouble. Some of the nation's biggest public solar companies are struggling to stay afloat as questions arise over the ...

The latest draft of the bill is broadly negative for clean energy, but it is particularly damaging to residential solar, cutting federal tax credits far sooner than expected.

In this article, we'll break down exactly why traditional rooftop solar is on the decline, and why new models like CraftStrom Solar are poised to become the standard for future energy...

For weeks, I'd been wrangling with my solar dealer about the panels it had installed on my roof months earlier. I'd passed all the necessary inspections.

Why did the photovoltaic panels disappear

Experts say the dip in residential solar installations is only temporary. Here's where the industry stands and where it's going. The solar industry is contracting in 2024. The solar industry...
