Why did a wind turbine collapse?

In February, a wind turbine collapsed west of Cheyenne, Wyoming. That collapse occurred during an "arctic wave," when temperatures dropped to 1 degree below zero and a persistent fog could have led to surface icing. On February 25th, a 120-meter Vestas turbine fell in a field in Elkton, Michigan during a winter storm.

Where did the GE wind turbine collapse?

The blades and top portion of the wind turbine collapsed in Dodge County, near the town of Herman in southern Wisconsin. The GE turbine, which is part of the Butler Ridge wind farm, stands about 400 feet above the ground. The collapse was so massive that it caused nearby houses to shake.

What happened at Point Tupper wind farm?

On August 17, a wind turbine tower in the Point Tupper wind farm, Nova Scotia, Canada collapsed. The collapse of the tower is supposedly the first incident of its type in Canada although collapses have occurred in other countries. The 10 other E-82 turbines at the Point Tupper site, built in 2010, were not affected by the collapse.

Did a wind turbine collapse in Wisconsin?

A wind turbine in Wisconsin collapsed, leaving a crater and debris strewn across a field. The blades and top portion of the wind turbine collapsed in Dodge County, near the town of Herman in southern Wisconsin. The GE turbine, which is part of the Butler Ridge wind farm, stands about 400 feet above the ground.

A dashcam captured the moment an 80-metre wind turbine snapped and collapsed onto a road, missing a car passing underneath by just seconds. The footage shows the massive structure slowly tilting...

The document provides a historical overview of wind turbine tower collapse cases, highlighting that engineering malpractices and extreme weather events lead to significant structural failures, with at ...

A major US wind farm has remained all but dormant for over four months as an investigation continues into the collapse of multiple Vestas turbines at the site, with a blade issue the ...

A wind turbine collapsed and blocked a road in Yeongdeok, North Gyeongsang, authorities said on Monday.

Wind turbine wind tunnel collapses

An investigation has been launched after a 115m wind turbine manufactured by Nordex collapsed on February 14, 2022, at Pant-Y-Wal Wind Farm in Wales. People who live nearby said they heard a ...

On August 17, a wind turbine tower in the Point Tupper wind farm, Nova Scotia, Canada collapsed. The collapse of the tower is supposedly the first incident of its type in Canada although ...

Ed Hall, engineering leader, onshore wind, at GE Renewable Energy said the sequence of five collapses - three in the US and two in Brazil (see panel at foot) - had sparked a major ...

An 80-meter wind turbine snapped in half and collapsed onto a road Monday in Yeongdeok County, North Gyeongsang Province. Debris from the blades, which were spi

In early 2024, residents of Plymouth, Massachusetts witnessed a dramatic turbine failure when a 75-100 foot wind turbine blade collapse occurred near Head of the Bay Road. The Plymouth ...

A harrowing accident occurred in Yeongdeok, on the eastern coast of Gyeongsangbuk-do, where a large wind turbine column collapsed and covered a road. The accident has blocked the ...
